Training Location: AmeriSuites Hotel & Trac Center
4525 Convention Place, Pasco, Washington 99301
Phone for reservations: (509) 543-7000

Course Description: The WMD Incident Command Training Course is 3-days of in-depth training that take the attendee through the entire spectrum of command of a WMD terrorist event. The course provides instruction on WMD, the incident command system coupled with the Federal response, and examines the complexities of operational considerations and actions of command at a WMD event. The course takes the attendee through pre and post considerations by incorporating a segment on planning for the response using techniques that allow the commander to determine the correct composition of the planning team, evaluating the threat to the jurisdiction, identifying and prioritizing probable targets, measuring required capabilities, and developing a local incident response plan to a WMD terrorist incident. The course culminates with the attendee participating in an eight-hour real time tabletop exercise using the materials developed in the previous sessions to plan for and command the emergency response resources at the incident site.

Course Length: 3 Days (24 Hours)

Target Audience/Disciplines: Command level responders in the fire service, law enforcement, emergency medical service, emergency management and emergency communications, or other emergency response profession. 50-60 Students.

Prerequisites: Emergency responders attending this training must be trained to the competencies outlined in OSHA 29 CFR 1910.120 and NFPA 472 for Incident Commanders, and they must have a thorough understanding of the Incident Command System. A video is available at your county Department of Emergency Management.
